

The Import Image Data Generator Library

Date	Project Name	Team ID
10-11-2022	AI-Powered Nutrition Analyzer For Fitness Enthusiasts	PNT2022TMID36454

- Image data augmentation is a technique that can be used to artificially expand the size of a training dataset by creating modified versions of images in the dataset.
- The Keras deep learning neural network library provides the capability to fit models using image data augmentation via the ImageDataGenerator class.
- Let us import the ImageDataGenerator class from Keras

```
from keras.preprocessing.image import ImageDataGenerator
```
